Job Announcement

JUNIOR EXHIBIT DESIGNER

Position: Junior Exhibit Designer for Science Centers, Children's Museums, and Cultural Organizations

Summary

We are seeking a creative and collaborative JUNIOR EXHIBIT DESIGNER to work as part of our team in Oakland, CA to develop and design innovative projects that redefine the museum and educational environment, both indoors and outdoors.

About Gyroscope

Gyroscope, Inc. is an award-winning interdisciplinary studio that prides itself on its strong, and diverse collection of skills and backgrounds. Our mission is to design learning environments that provide value for children, families, and communities. We are a group of creative thinkers, architects, designers, artists, and collaborators, with a holistic approach to learning, delivering high impact results to our clients.

We create learning experiences over a broad range of environments and design platforms that include science centers, children's museums, learning gardens, enrichment centers, libraries, cultural institutions and site-specific art installations. As a design studio, we provide an opportunity for unlimited creative growth with the challenge and responsibility to transform vision into reality.

Specifics for the position:

- Investigate, develop and design new models for learning environments
- Collaborate with internal team, client, and project stakeholders
- Support designers and developers in the office
- Plan and complete project tasks from inspirational concepts through construction documents
- Think and work in a wide variety of disciplines including STEM, educational theory, architecture, multimedia, graphics, and interactive exhibits design.
- Communicate ideas internally and to clients through sketches, illustrations, diagrams, drawings, verbally and in writing
- Develop designs from conceptual renderings and 3-D models, through schematics, design development, CD and bid phases
- Coordinate with design team

- Research and integrate formal and informal learning practices, new materials, technologies, and building methods into design ideas
- Contribute to the development and growth of a multidisciplinary design studio
- Some travel to meetings and site visits will be required
- In support of a collaborative and creative office culture, all staff works in the office
- Architectural training (Optional)
- Report to Project Lead Designer

Qualifications:

- A minimum of 2 years professional design experience (museum experience preferred)
- A deep passion and commitment to design collaboration. Must work well collaboratively in a multidisciplinary team, taking direction and constructive criticism from others, and maintaining tight timeframes
- A strong desire to integrate exhibit design with architectural design
- Ability to think with your hands; proven experience in designing and building things. This includes knowledge of the design process, ergonomics, Universal Design, user interface, materials, construction skills, and building techniques
- Experience working in the field(s) of architecture, landscape design, exhibit design, and education.
- Excellent organizational skills and a strong ability to plan and coordinate a project on schedule and budget
- Fluent in sketching and drawing
- Proven ability in the use of computer-based tools: Vectorworks 3D, Adobe Creative Suite, Microsoft Office, SmartSheet
- B.A. or M.A. in Architecture, Interior Architecture, Industrial Design, Theater Arts or equivalent (preferred)

Compensation

Commensurate with experience
